WHAT IT INCLUDES: The plan is for residential homes only!

- **Dye test toilets for hidden leaks:** The average leaky toilet wastes around 200 gallons of water per day.
- **Integrity evaluation of all faucets, tub/shower valves and safety valves:** Just a small drip (1-drip per second) is more than 3000 gallons of wasted water per year.
- **Visual Evaluation of drain and waste system:** Most home owners will spend \$250 to \$900 dollars on drain waste breakage repairs.
- **Integrity evaluation of washer, dishwasher, ice maker connections:** Flex water connection lines that leak or burst are costing home owners more than \$6,000 in repairs.
- **Water heater safety check:** A water heater leak can be the root cause for health concerns as dampness can sprout mold and mildew, which can cause allergic reactions in some people, plus cause water damage
